PREMIER KNOWLEDGE SOLUTIONS ANNOUNCES NEW DEEP LEARNING METHODOLOGY

St. Louis, MO, August 10th 2011- Premier Knowledge Solutions is pleased to announce their new learning methodology: Deep Learning[®] available through their open enrollment schedule, dedicated courses and PKxSpanse (remote learning instruction). Through a series of increasingly more challenging interrogative exercises, punctuated with current knowledge capture exercises, post-exercise individual and shared group discovery activities, capped by mega-lab work and social learning resources, Premier Knowledge Solutions' Deep Learning[®] begins with the final and correct learning objectives required to master a technology, pass certification exams and or increase your earn power. Premier Knowledge Solutions has already designed over seven Deep Learning[®] courses for CompTIA, Microsoft and IT Governance courses. "The collective pass rate among the Deep Learning courses is over 95%," says Bill Biermann Director of Training Operations, "students really appreciate courses that combine both real-world and exam-based knowledge."

Richard Losciale, President of Premier Knowledge Solutions and co-creator of the Deep Learning[®] Methodology feels that "PKS Deep Learning[®] incorporates both time-proven technical training techniques as well as recent findings on how today's IT professionals and students best master complex bodies of knowledge. We are thrilled with both the certification pass rates and customer input we are seeing. PKS Deep Learning[®] begins with the end in mind and thus is a focused, results-driven classroom training methodology that all types of learners will benefit from."

About Premier Knowledge Solutions

Premier Knowledge Solutions is a Microsoft Gold Learning Partner with additional Silver Competencies in Desktop, Data Platform, Portals & Collaboration as well as Identity & Security. The St. Louis-based firm opened their doors in 2004 serving primarily the bi-state area while continually increasing their reach, allowing them to train clients globally. PKS offers a broad array of training in many formats (Instructor-led, Remote Classroom Instruction, eLearning, dedicated courses and private training) on the latest topics and technologies, taught by Microsoft Certified Trainers.
